

There are 13 Rules to the game

- 1) **Rule 1** - You must start with finding a penny. You cannot use any of your own money. If you find more money, you must spend it.
- 2) **Rule 2** - Don't Skip Steps. Skipping steps will cause you to fail as you get to larger numbers
- 3) **Rule 3** - Going backwards – If you buy something but sell it for less than you paid, you must go back to the step that applies to the dollar amount you sold it for. Example: If you buy something for \$10 (step 11) but can only sell it for \$4 you need to go back to step 9 (\$2.56 - \$5.12). This is real life experiences.
- 4) **Rule 4** - Creating value – The secret is to research and learn with people will pay for something then make offers until you can purchase it for less and sell for more. Use this approach with small or large dollar amounts.
- 5) **Rule 5** - Use the same money you received – Keep the money separate from all of your personal money. Keep it in a separate pouch or bank account so you can accurately track it.
- 6) **Rule 6** - It's not your money until you cash out. The money is free (started with a free penny) and you create value which makes it grow. You can't use your own money.
- 7) **Rule 7** - You must use the actual money you earned at each goal. Don't use the money to pay bills when you are short. If you do, you must start over.
- 8) **Rule 8** - You cannot spend the money you make at each step except on the next step. If you do, the game is immediately over and you must start from the beginning. This game is to build wealth in both knowledge and in value. Keep it as a game and not your primary income.
- 9) **Rule 9** - Keep all external investment money separate from the game. If you were playing a board game with friends, you would not use pieces of another game to play.
- 10) **Rule 10** - There is no time limit on the game. Choose your own time strategy. We recommend 2 years but you can go slower or faster.
- 11) **Rule 11** - If you spend any of the money outside of the game, the game is over. The game should be your investment money and kept separate. Avoid the temptation and stay true to your financial journey.
- 12) **Rule 12** - Share your success. Find a “Buddy” to play with. Spread the word on social media and share your success with each step.
- 13) **Rule 13** - If you get stuck, send a help request to [support@millionairesbygeorge.com](mailto:support@millionairesbygeorge.com) and we can help you get “unstuck”.

That's it! You may not understand what this game teaches you but we are offering the game and all the support for a simple monthly \$5 investment, you are on your way to changing your financial future.
